Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the hollow tube and elongated member (claims 2, 10 and 18 must be shown or the features canceled from the claims. No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, 5, 8, 9, 10, 12, 13, 16, 17, 18, 20, 21 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Dumler et al. (hereinafter Dumler) In regard to claims 1, 9 and 17, Dumler discloses multiple applicators comprised of an elongated housing separated into multiple sealed compartments 7, 8 along its length, an elongated

member 5 having a free end with an applicator 2 and another end affixed to the compartment and opening means 11, 12, 13, 14 located at each compartment "near" the applicator tip whereby each compartment may be opened and removed and wherein the housing may be selectively "severed" into shorter sections at the opening means. In regard to claims 2, 10 and 18, Dumler discloses a holder 4, 6 comprised of an elongated member with a hole at its end (at threaded sections 13, 14) to hold the severed section. In regard to claims 4, 12 and 20, the compartments enclose a viscous substance (mascara). In regard to claims 5, 8, 13, 16, 21 and 24, the ends of compartments 7 and 8 opposite the threaded ends define an end that extends beyond the sealed end of the last sealed compartment and can act as a handle for the user to hold such that the last compartment can be opened easily.

Allowable Subject Matter

Claims 3, 6, 7, 11, 14, 15, 19, 22 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The St. Pierre et al. and Kuhlman references are cited for disclosing other separable container structures.
